

## 2408 : Powered hydraulic bender

For medium and heavy series gas pipes (nfa 49115 - en 10255).

### ADVANTAGES:

**BENDING CAPACITY:** Gas pipes: Ø 3/8" to 4". Locksmith's pipes: Ø 12 à 50 mm. Electrical conduits: no. 9 to no. 48.

**BENDING ANGLE:** Standard 0° to 90° 0 to 180° with special tooling for 3/8" to 2" gas pipes.

Manual and electrical benders for site or workshop.

Virax hydraulic benders have single-acting spring return pistons.

Bender kits come in a wooden box complete with formers and accessories.

**TIP:** Use Virax hydraulic ram oil for best protection. All necessary precautions must be taken when filling the ram to avoid foreign matter entering the reservoir as this may impair operation. Use horizontally.

\* delivered in two wooden chests
