

2620 : Test pump 12L - 100 bar

ADVANTAGES:

Specially designed for low-temperature copper pipe heated floor systems such as CUPRASOL® by Trefimetaux, which must be tested at a pressure of 100 bar.

For leak testing water installations (plumbing, individual central heating, etc.).

Sheet steel water tank with tough, impact and corrosion-resistant epoxy paint finish. Fully machined monobloc cast-aluminium pump body. Cast iron lever sized for a powerful grip. Stainless-steel piston; brass; brass intake and delivery valves fitted with stainless steel balls; brass drainage valve to guarantee no corrosion. Nylon strainer (filter) on intake to block particles exceeding 0.1 mm diameter to protect the pump mechanism and the customer's installation against foreign material. Gaskets and components also compatible with oil and antifreeze. High pressure hydraulic hose (1.2 m).

Overall dimensions mm: H = 340 x L = 380 x W = 130.
