## Guide column

Due to the modular construction, the Bansbach guide column is very flexible and can be used for numerous applications. It doesn't matter if the application will be moved with one or more columns. Due to the variable lengths of the traverse members, nearly all requirements can be met. The piston rod which is secured against rotating offers an additional security.

### product features:

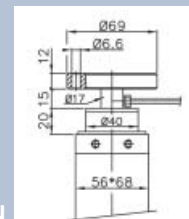

- rotating-secured
- available in any length (Attention: please consider the minimum length in relation to the stroke length)
- hose connection possible on both sides
- traverse members to connect multiple columns are available in variable length
- suitable for all adjustment cylinders

Part number

FS	100	300	FZ	FB
guide column	stroke	extended length 2	connecting part piston rod	connecting part foot

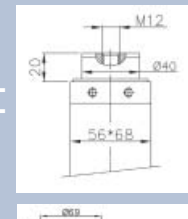

### possible connection parts

Schlauchabgang oben  
hose connection  
at the top
